

The George Brown College Labour Fair and the Tommy Douglas Institute present

Labour Fair 2024

March 18th – March 22nd

CORPORATE POWER vs. LABOUR POWER IT'S OUR WORK!!!

In the 2020s...

- .. the world's majority have had to deal with COVID, conflict, a worsening climate and cost of living crisis.
- ... prices and precarity have gone up, while wages and security have gone down, right along with our social, political, economic and labour power.
- ... the five richest men have doubled their wealth, while 5 billion people have become poorer.
- ... we have collectively become witness to a new era of inequality driven by corporate monopolies, but resisted by peoples mobilizations, from community activism to union organizing.

It's the 2020s and we're only 4 years in.

Will this decade be one of loss for the world's people and planet? Or can it be one of resistance and reclamation of our world, our labour and our power?

Labour Fair Events

For full and updated Labour Fair Program with links to online sessions, visit: [Labour Fair | George Brown College](#)
